Press Advisory

**AGUA to file TRO to stop INTCO Dominion from clearing land adjacent to
Camp Bullis**

The board of the Greater Edwards Aquifer Alliance (GEAA) met today to figure out which of the 43 member groups of GEAA might be the best one to quickly file a motion for injunction to stop clearing immediately. Many groups were interested in participating, and some may join AGUA in further actions to insure that the health of the Edwards Aquifer, and the economic benefits of the Army's mission in San Antonio continue to serve our community.

GEAA member group, Aquifer Guardians in Urban Areas (AGUA), will file a Temporary Restraining Order on INTCO Dominion to stop clearing their site, invoking the Endangered Species Act.

For information on this action, please contact AGUA Spokesperson, Enrique Valdivia.

It is the hope of the Greater Edwards Aquifer Alliance that development on this site be halted immediately, and we are grateful to AGUA for taking the necessary action.
