

Dear GEAA members and friends,

I have been invited to present the results of our study on Watershed Stewardship for the Edwards Aquifer Region at the [International Low Impact Development Conference 2015](#). This is a great honor, as well as a great opportunity for GEAA. I will be joining to top practitioners of Low Impact Development for four days in January to share techniques that can be adapted to enhancing Edwards Aquifer recharge, and learn what is being done in other cities around the world.

We were also invited to present at the [Texas Society for Ecological Restoration Conference](#) in Alpine this month, but a busy schedule combined with a meager budget prohibited our participation this year. (Anyone interested in attending can still register). We have already been invited to present at the TSER Conference for 2015, when the conference will be held in San Antonio.

GEAA has no money in our budget to cover travel expenses associated with presenting at the International Conference on Low Impact Development in Houston this coming January. We estimate that expenses will come to about \$450. Anyone interested in donating to send me to the conference can [make a donation on line](#), or can mail us a check to GEAA, PO Box 15618, San Antonio, Texas 78212.

You can check out our manual on Low Impact Development, *Watershed Stewardship for the Edwards Aquifer Region* [here](#), and you can order a hard copy to be mailed to you by [clicking here](#).

Thank you so much for your on-going support!

Annalisa Peace, Executive Director
