

Dear GEAA members and friends,

I'd like to share some thoughts on water as we go into another dry summer.

State Representative Lyle Larson's opinion piece "[Hold State Legislators Accountable for Water Plan](#)" makes a strong case for water planning, and makes me really thankful that we have someone in the Legislature who gets it.

Meanwhile, the [Rivard Report](#) opened up a whole can of worms with "[Spills and Sprawl: The Edwards Aquifer Comes Under Increasing Threats](#)". Of course, I had to weigh in with "[Upstream Without a Paddle: Seeking Protection for the Edwards Aquifer](#)", as did Solar San Antonio's Lanny Sinkin with "[Private Profit Over Public Good Led to Failure to Protect the Aquifer Recharge Zone](#)".

These essays will definitely give you something to think about while you are not watering your lawn this summer. Enjoy!
