

Dear GEAA members and friends,

We need your support for [H.B. 3036](#) (King) which will prohibit the Texas Commission on Environmental Quality (TCEQ) from permitting discharge of sewage effluent directly into any water in the Contributing Zone of the Edwards Aquifer. You can read more [here](#).

I am delighted to report that this bill will be heard by House Environmental Regulations Committee on April 11th. [Click here to sign the petition that will be sent to Committee members](#). We only need 40 more signatures to make it to 1,000. Let's go for 2,000! **Please sign and forward the petition to everyone you know.**

Over the past decade Hill Country citizens have spent millions of dollars fighting these Texas Pollutant Discharge Elimination System permits to discharge into surface water or dry creek beds. We actually have a chance at putting a stop to [this filthy practice](#) forever.

With your help, we can pass this important measure to protect our beautiful Hill Country springs and streams, and our Aquifer.

Thank you for everything and, have a great weekend!

Annalisa Peace

Executive Director
[Greater Edwards Aquifer Alliance](#)
