

DONNA CAMPBELL, M.D.

TEXAS STATE SENATOR
DISTRICT 25

January 10, 2020

Toby Baker
Executive Director, Texas Commission on Environmental Quality
P.O. Box 13087
Austin, TX 78711-3087

Dear Director Baker,

We greatly appreciate all the Agency does to insure the safety of Texans' water, land, and air. We realize you undertake a monumental job which often involves hostilities from all sides. Thank you for persevering.

I am writing on behalf of several constituents to request a Public Meeting regarding permit #WQ0015835001. As you know, the original Water Quality permit application was withdrawn and this new application was submitted as a Texas Land Application Permit (TLAP) in its place. Typically most of our constituents are pleased when this type of application is submitted; however due to the pristine nature of Honey Creek and this development's location adjacent to the environmentally sensitive Honey Creek State Natural area, as well as its proximity to the popular water recreation area, Guadalupe State Park, there is concern about waste water and stormwater pollution.

While we are aware and appreciative of the developer's many-faceted effort to address the community's objections; we believe it would be helpful to all concerned to discuss this project at a public meeting. Thank you for accepting this request.

Sincerely,

Senator Donna Campbell

Senate District 25

Chair Veteran Affairs & Border Security
