

MEMBER SPOTLIGHT

Environment Texas, our highlighted Member Group of the month, has been standing side by side with GEAA from its inception, forging one of our earliest and strongest alliances.

They fiercely advocate for clean air, clean water, clean energy, wildlife and open spaces, and a livable climate. Environment Texas members across the state put grassroots support behind scrupulous research and effective advocacy.

We at GEAA share their vision of a greener Texas: one that protects m
places where nature can thrive, and offers us and our children a great
opportunity to live healthier, more enriching lives.

Through research, public education, advocacy, litigation, and action,
Environment Texas is working to advance policies and practices that p
our state and our country on a better path.

We invite you to learn more about Environment Texas and how to be
part of the beneficial changes coming from their good work, at the
link [here](#).
